Sweet Corn

Contracted sweet corn production is forecast at 2.73 million tons, down 16 percent from last year. A decline of 10 percent in contracted harvested area is accompanied by a decline in yield of 0.49 ton per acre from 2009. Oregon's sweet corn crop was delayed due to cool and wet spring conditions. In Wisconsin, harvest was delayed due to standing water in the fields.

Snap Beans

Contracted production of snap beans is forecast at 736,680 tons, down 6 percent from last year. Contracted harvested area is down 1 percent, and yield is down 0.19 tons per acre. In Oregon, harvest was delayed due to late spring plantings. In Michigan, insect and disease problems have been reported in some fields due to hot and humid weather. In Illinois, excessive rainfall across the State negatively impacted yields. In Indiana, heavy rainfall during the planting season delayed field preparation. In Minnesota, snap beans are reported to be in good condition due to warm temperatures and plenty of rainfall. Pennsylvania growers experienced very hot and dry weather during the growing season. In Wisconsin, snap beans are progressing at a slow pace due to heavy rainfall during June and July.
